

TARA GreenCast Floor Enterprise

TARA GreenCast Floor Enterprise is producing quality building material by utilization of ash generated in the captive power plant at Dhampur Sugar Mill, Asmoli, U.P.

Dhampur Sugar Mills, one of the leading sugar manufacturers located in Asmoli, Uttar Pradesh are now able to convert their boiler ash waste into building products by using the technology customized by TARA Machines. The waste is converted into usable green building products; ash bricks and floor pavers.

DSM, Asmoli has pioneered the initiative to utilise their ash with technology and material research capability, provided by TARA Machines.

TARA Machines has the capability to provide custom made solutions, machines and mix-design for utilization of combustion wastes generated from captive power plants of paper and sugar industries. The products made from ash utilization are suited for construction and special building applications.
